

Fingers are the main physical connection between technology and the human mind.
We experience digital technology with fingers.

WE

click...
touch...
feel...
carry...
work...
play...
move...

None other than with Fingers.

Fingers communicate so much more.

We make gestures with our fingers, consciously and subconsciously, by

- Showing direction
- Bringing a point of view
- Expressing love
- Signalling on a cricket field with raised fingers - Either disappoints us or bring cheer.

Fingers communicate a lot... It's a language!

At FINGERS, we are here to create 'A New Language of Technology'. Our team takes immense pride in possessing over 450 years of collective experience in the digital space, with a proven track record of creating transformational digital experiences.

Each gadget is crafted with love and the utmost attention to detail by a Dynamic Team that believes in being MAD - Making A Difference - A difference in the way you feel, play and experience Quality Technology. We believe technology should be Trendy and Innovative yet speak in a way that moves and inspires you. And we stand for what we believe - A New Language - breaking the norms and stereotypes.

👋 Five Milestones. 🎯 One Unforgettable Journey!

¹Can withstand up to 18 drops with up to height of 1 m.

²Tested under ideal conditions and in Bluetooth® playback mode. Playback time may vary depending on usage, playback mode and volume levels.

³TWS function can only be enabled to pair two same portable speakers.

⁴Tested under limited conditions. Do not immerse in liquid. (Sweat resistant/Sweat proof/Sealed Membrane)

⁵Supports PD+QC Power Delivery technology (18W Max). It can even charge Laptops using Type-C to Type-C cable.

Charging time for higher voltage devices may be longer than its original charger due to max. 20 W Power Output.

⁶Power Delivery is a fast charging technology, supported by certain iOS and Android devices, that delivers much higher levels of power than standard charging.

⁷Handle with Care and ensure your phone is placed properly.

⁸Wireless charging support is also compatible with devices having power 5W, 7.5W, 10W output max is 15W.

⁹Tested under ideal conditions. Battery backup time may vary depending on usage.
